

Dam

Design: Marco Piva

Description

The elegant Dam sideboard, rectangular in shape like the famous square in Amsterdam, features wooden doors in various finishes, such as black ash, with a folding opening, which can be separated by a central drawer in the low version that conceals an additional storage element. The metal part follows the entire low perimeter of the cabinet and ends in four feet at the outer corners. The Dam sideboard collection is enriched with additional elements of different sizes, such as the high version and the cupboard. Made in Italy.
