

Regina

Design: Andrea Andretta

Description

Ergonomic lounge chair with a solid wood structure, fixed seat and back cushions in 40Kg/m³ density polyurethane foam. Regina represents the stylistic translation of three fundamental concepts. The first has its roots in the past, retracing the lines and shapes of the Scandinavian 70s, the second enhances the craftsmanship and artisan technique that has always distinguished Italian design, while the third aims to celebrate the materials used, in particular the elegant solid wood of the structure. The seat and back padding can be upholstered in a fascinating and refined variety of fabrics and leathers. Regina is perfect in both, public and private spaces. Made in Italy.

Dimensions

29"1/2W x 24"3/8D x 28"H
SH: 16"1/2 | AH: 24"3/8
