

Twin

Design: Michele di Fonzo

Description

A playful interplay of geometries defines this wall mirror, designed for the living area or the bedroom, an essential complement that thanks to its design and its finishes is easily adaptable to both domestic and contract environments. A game of geometries defines the boundaries and functions of this open mirror.

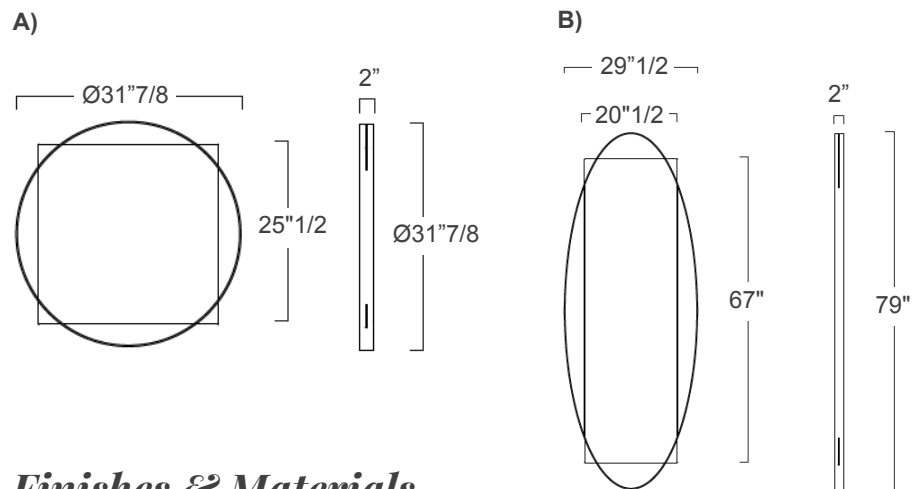

The collection offers two distinctive versions: one features a metal profile shaped into an oval that frames a rectangular mirror, while the other pairs a round frame with a square reflective surface, creating a unique and dynamic visual contrast.

Made in Italy.
