
Mass Pressure

Design: Dror

Description

The unique Mass Pressure Dressed armchair represents the commercial version of the Mass Pressure concept, a project by Dror designed to raise awareness among the masses about respecting nature. The structure, crafted from tubular metal, consists of two separate components that compress a segmented foam monoblock into three elements, giving them an innovative and captivating form. The three polyurethane elements and the upper part of the metal structure are covered in premium boucle fabric available in 5 shades. Made in Italy.
