

Twist

Design: Burtscher & Bertolini

Description

The unique Twist coat stand. One might say that Horm dances the twist rhythm with the Burtscher & Bertolini hanger. Indeed, the eight beech slats in its structure bend and twist as if they were dancing. Their elastic tension is essential to provide the hanger with excellent form and stability. Twist responds to a simple yet important observation: hangers usually vanish when you hang your coats or clothing. However, Twist does not disappear. Conversely, it is emphasized as only its central part is covered. Clothing can be hung on hooks stuck in the slats allowing the upper part of Twist, a beautiful “wood flower”, to emerge in all its elegance. Made in Italy.

Finishes & Materials

Structure: Wood.

Dimensions

Ø23"5/8 x 65"3/4H
