

Lem

Design: Shin & Tomoko Azumi

Description

Stool with fixed height, swivel seat with metal frame in matt chromed and base covered by a stainless steel sheet "linen fabric" pattern or entirely powder coated. Seat in plywood in several finishes. Felt under the base. Also available with self-return mechanism.

In 1969, man reached the Moon aboard the LEM (Lunar Excursion Module). In 2000, at the turn of the millennium, the LEM stool was born. The same lightness, the same absence of gravity which, in the vacuum created by the design, favors its relationship with the environment. When an environment requires functional and versatile furnishing solutions, the perfect choice is LEM, which with its innovative, soft and simple shape, combines practicality and style. Made in Italy.

Dimensions

14"5/8W x 16"1/2D x 34"5/8H

Seat height: 31"1/2
