

## Cubix

*Design: Giulio Manzoni*

### *Description*

Transformable ottoman equipped with castors for easy handling. It can be used as a seat when completely “closed”. The elegant double stitching simplifies the repositioning of the four internal seats. The extraction of the seats is practical and intuitive. It is possible to use the number of seats needed and leave the other ones stored inside the ottoman. The four internal seats, once extracted, can also be used without the backrest as simple ottomans. For greater comfort and complete freedom of use, the four internal seats are equipped with a padded backrest. While the ottoman with castors can also be used as a coffee table.

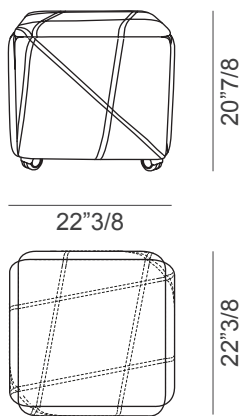

Surprising, transformable, essential, are just some of the adjectives that best describe this innovative item. The futuristic study of intersections hides five seats inside, four of which are comfortable chairs with upholstered backrests. A unique item easy to use, equipped with four sliding wheels for easy handling, and an elegant double stitching design to simplify the opening and closing system. Made in Italy.
