

## Eclisse

*Design: Bosco Fair*

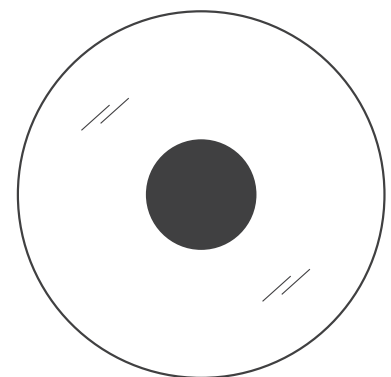

### *Description*

Decorative wall mirror characterized by a design both essential and rich in visual references, inspired by the hypnotic gaze of a solar eclipse. The central disc evokes the infinite depth of a black hole and, at the same time, the passage of a planet. The antique mirror inspires visions of ever changing skies.

The varying shades suggest both the luminous aura of a galaxy in transformation and the shimmering iris of a large eye peering out at the world. Mirrors multiply spaces, reflect light and at times allow us to glimpse reality from another point of view. The structure is made of MDF lacquered and the mirror ring can be finished in Cobalt Blue, Antique Gold, or Sunset Pink. The back panel is lacquered in matt Casa Casati's Orange (Casa Casati's signature color). Made in Italy.
