

Musa

Design: Emanuele Genuizzi

Description

A sculptural table with a marble top and structure in high density polyurethane resin. Inspired by the agile forms of classical sculpture and the soft, powerful curves of Hans Arp, the tables in the Musa series are characterized by the substantial oval-section plinth base. Thanks to a meticulous study of the joints and counterweights, the base supports a series of cantilevered marble tops of different sizes.

The richness of tones, the absence of straight lines and the fluidity of the curve show the simplicity of the design and the beauty of the precious marble tops, with the gently curved edges perfectly complementing the structure. The special lacquer finish on the base of Musa and on the underside of the top is obtained by applying layers of superimposed colors to create the desired effect of depth. Musa can be used as a dining table or as a decorative element. Made in Italy.
