

Gordon Deep Wood

Design: Giorgio Cattelan

Description

The family of modern tables Gordon, designed by Giorgio Cattelan, looks like a cross of geometric lines that move in an apparently chaotic way yet, instead, order and planning create perfect symmetry. This play is even more evident in the round model of the glass table, which is also available in ceramic, where, when viewed from above, the shape of a three-dimensional star is recognisable.

Gordon Deep Wood is a Table with titanium, graphite or black embossed lacquered steel base. 3"1/8 thick wooden top with irregular solid wood edges in Canaletto walnut (NC). Due to the complexity of the top processing, special finishes or dimensions can not be realized. Made in Italy.
