

Duetto

Design: 967ARCH

Description

Stool characterized by its versatile design and its ability to adapt to both contract and domestic environments. Duetto is composed of two thin metal blades in tension that support a sinuous polypropylene seat, creating a harmonious dialogue between materials. Characterized by essential lines, lightness and a recognizable graphic sign, Duetto is available in two finishes and two heights. This iconic yet functional stool stands out for its strong visual presence, making it ideal as an informal seating option for a variety of corporate, public and private settings. The load-bearing structure is made of powder-coated (micro-goffered steel) in matt painted colors. The seat and footrest are in glass-filled polypropylene in white and black colors, matching the structure. Available in monochrome combinations only. Available in the fixed version and in the 360° swivel version. Made in Italy.
