

Peggy

Design: Gio Tiroto

Description

With its curvy, enveloping design, this lounge chair conveys a sense of security and cosiness, breaking away its historical context to become an iconic piece defined by its pure contours. The backrest makes it both light and dynamic, as well as soft and comfortable. The structure is made of tubular steel and the seat with a belted frame and (recycled) polyurethane foam.

Peggy consists of just two parts: a base-backrest and a seat, joined by a fixing system that allows it to be disassembled. Available with a fixed or 360° swivel base, equipped with a return mechanism. The upholstery, offered in a wide range of fabric options, envelops the entire product and is designed to enhance its shape. The upholstery is not removable. Made in Italy.
