

## Tense Material Heritage

*Design: Piergiorgio Casznaniga*

### *Description*

In the Tense Material Heritage dining table, the natural or black painted oak table top is finished with a handmade process known as 'sgorbiatura' (wood hand carving). This technique involves carving the wood in an irregular manner to achieve a wavy effect and offer an intensely tactile experience. This meticulous process - which requires several hours of work for each table - completes a structure that embodies the technological and industrial innovation that enabled it to reach considerable dimensions. Made in Italy.

### **Technical Information:**

The legs are made in steel, 1<sup>3</sup>/<sub>8</sub> x 1<sup>3</sup>/<sub>8</sub> section, with internal structural tie-rod. The 1<sup>3</sup>/<sub>8</sub> thick top is a load-bearing composite panel made from an internal aluminum profile frame and a polystyrene filling. Natural or black-stained oak finish, transparent acrylic surface finish. Edges and legs are covered with 1/8" thick solid wood. The fineness and special workmanship of the tops can result in differences in finish and tone. Therefore, any visual irregularities in the design, shading, and non-uniformity of the surface and color of the material should be considered unique and valuable characteristics.
