

# Novecento

*Design: Fabio Rebosio*

## *Description*

Elegant glass or wood top dining table with a sophisticated structure. The conical and elegantly tapered legs of the Novecento dining table give it a fluid dynamism and a clear sense of visual lightness.

The sophisticated longitudinal structure, in solid ash like the four legs, creates a refined contrast with the top above. In veneered ash (1"1/8 th.) or in natural, transparent bronzed or smoked tempered glass (3/8" th. or 1/2" th.) with electro-welded plates, the table top meets the underlying structure with great elegance, creating a product of class and exquisite refinement. Made in Italy.
