

Mask

Design: Bonaldo Lab

Description

Light in form yet with considerable attention to detail, the Mask chair is noticeable on account of its open backrest, in which the void becomes an integral part of the design. The balance between presence and absence gives the chair an airy and contemporary character in a game of subtraction that streamlines its frame.

Just like a mask, which conceals and reveals at the same time, the design behind the Mask chair plays with full and empty spaces, transforming the interchange between these elements into an expressive detail. The clean, precise yet never rigid lines combine with the softness of the fabric, eco-leather or leather upholstery.

The result is a chair with a strong personality which offers a feeling of natural familiarity in numerous different furnishing contexts. Made in Italy.

Finishes & Materials

Cover: Fabric or leather.
