### *Description*

Playful in spirit yet refined in craftsmanship, this exquisite Clownfish sculpture set, comprised of one large and one small figure, beautifully captures the vital charm of the ocean's most beloved creature. Masterfully sculpted from radiant Colle Val d'Elsa crystal, each fish comes to life with fluid lines, impeccable detail, and the brilliance characteristic of Tuscany's renowned glassmaking tradition.

The combination of sizes creates a natural sense of movement and camaraderie, evoking an adult fish and its young gliding together through sun-drenched waters. This duo offers a fresh and artistic interpretation of marine life, perfect as a statement piece or as a treasured addition to a refined crystal collection.
