With a majestic form and luminous presence, this distinguished set of two Fish Regina sculptures (one big and one medium) captures the essence of underwater elegance with refined artistry. Meticulously handcrafted from the celebrated Colle Val d'Elsa crystal, each fish radiates exceptional clarity, with the light playing on their sculpted fins and gently curving silhouette in a display of graceful movement.

The combination of sizes creates a harmonious dialogue between the two figures, evoking a sense of brotherhood and natural rhythm as they appear to glide together on an invisible current.
