Description

A refined homage to tradition, unity, and natural elegance, the Perched Hen and Rooster sculptures are exquisitely crafted from the shimmering crystal of Colle Val d'Elsa, Italy's treasured birthplace of artisanal glassmaking.

Captured in a moment of majestic stillness, the rooster stands watchful and proud, while the hen rests beside him in delicate repose, their forms delicately balanced in both composition and spirit. Sculpted by master artisans, this piece evokes themes of protection, companionship, and rustic nobility, reimagined through a lens of luxury. An elegant centerpiece offering timeless symbolism enhanced by extraordinary material and form. Made in Italy.
