

Hippopotamus

Design: Duccio di Segna

Dimensions

14"1/8W

Description

Solid, elegant and quietly imposing, this Hippopotamus sculpture is sculpted from the luminous crystal of Colle Val d'Elsa, the historic center of fine Italian crystal. Capturing the gentle strength and serene presence of this majestic creature, the piece is a study in balance between mass and transparency, weight and lightness.

Its soft, rounded form is rendered with minimalist precision, allowing the exceptional clarity of the crystal to take center stage. The subtle contours suggest strength beneath the stillness, while the surface reflects and refracts light with a serene brilliance unique to the craftsmanship of Colle Val d'Elsa. Made in Italy.
