

# Marlin Fish

*Design: Duccio di Segna*

## *Description*

Crafted from legendary Colle Val d'Elsa crystal, this exquisite decorative sculpture captures a Plumed Marlin Fish rising in an arc on the crest of a wave, the Marlin's form is sculpted with meticulous precision: its slender, elongated body, its muscles taut, and its beak pointed skyward, as if chasing the horizon. The wave beneath it, rendered in fluid, transparent curves, evokes the energy of the sea in its crystalline stillness.

Elegant and imposing, this piece is both a tribute to the power of the Marlin and a celebration of Italian glassmaking heritage: a striking centerpiece that embodies fluid movement, oceanic majesty and artisanal delicacy. Made in Italy.

## *Dimensions*

**Model A:** 19"5/8H

**Model B-C:** 23"5/8H
