

# Nautilus Shell

*Design: Duccio di Segna*

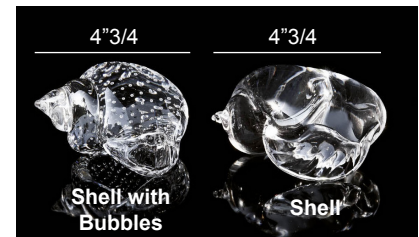

## *Dimensions*

4"3/4W

### **SET OF 2 SHELLS:**

Shell with bubbles + Shell

## *Description*

This captivating sculpture features a harmonious set of two Nautilus Shells: one impeccably transparent and the other delicately imbued with suspended bubbles, each meticulously handcrafted from luminous Colle Val d'Elsa crystal. Together, they evoke the serene mystery and timeless geometry of the hidden realms of the sea.

The completely transparent shell radiates clarity and purity, while its counterpart, dotted with ethereal bubbles, offers a more tactile and organic texture, evoking life in motion. This interplay of surfaces creates a visual dialogue between the perfection and imperfection inherent in nature. Echoes of the deep, this elegant centerpiece, invites contemplation and admiration. Made in Italy.
