

# Reindeer Rearing

*Design: Duccio di Segna*

## *Dimensions*

15"3/4H

## *Description*

An embodiment of nobility and indomitable elegance, the Reindeer Rearing sculpture stands with a commanding presence, masterfully sculpted in luminous crystal from Colle Val d'Elsa, the historic heart of Italy's fine crystal-making. Captured in motion, with its forelegs raised and antlers raised, the reindeer evokes power and poise in a composition of striking verticality and balance.

The exceptional clarity of the crystal refracts light with a refined brilliance, illuminating every sculpted detail, from the taut musculature to the finely engraved antlers, with an ethereal glow. Sophisticated and sculptural, this piece is more than a decorative element, it is a celebration of the majesty of nature, captured in crystal for the most exclusive collections. Made in Italy.
