### *Description*

An elegant set of four masterfully sculpted crystal figures: a majestic cat in pursuit, two alert mice standing upright above, and one in rapid retreat below, all exquisitely crafted from the luminous crystal of Colle Val d'Elsa, the Italian epicenter of artisanal glassmaking.

The regal cat, sculpted in the midst of a hunt, radiates feline precision and nobility, with a fluid and focused posture. In contrast, the mice, rendered with delicate expressiveness, capture a dynamic narrative of ingenuity and survival. Two stand tall, vigilant, and motionless, while the third swiftly descends. Each figure is individually hand-finished by Tuscan artisans, together, they compose a refined interplay of movement, hierarchy and character frozen in time and light. Made in Italy.
