Description

A seamless blend of Italian artistry and contemporary engineering, the NOHRD Ciclotte redefines the exercise bike. Crafted with powdercoated premium metal and solid wood, its iconic circular design serves as both a statement piece and a high-performance fitness machine.

Riding the NOHRD Ciclotte is more than training—it's a statement of taste. Designed for those who value aesthetics as much as performance, it seamlessly integrates into luxury interiors, embodying a refined lifestyle built around movement, presence, and precision.

More than equipment, the NOHRD Ciclotte is functional sculpture. Its striking circular frame, reduced to pure form, stands as a modern icon—crafted to be seen, to be used, and to be admired. Built using premium wood and metal components, each NOHRD Ciclotte is a study in material excellence.
