

Campanula

Design: García Cumini

Description

Genteel beauty that originates in echoes of nature, with its ability to multiply, always in new, spontaneous ways. The modular design of this collection combines the tradition of craftsmanship with a contemporary, lively approach to composition. There are as many as eight versions, alternating the modules and their respective textures, varying the image and the size. Poised and elegant, the suspensions extend into space, following a primarily vertical axis. The protagonist is Venetian Crystal, bright and hypnotic, a perfect embodiment of a floral archetype. Made in Italy.
