

Vertigo

Design: Barovier&Toso

Description

Vertigo combines dynamism and symmetry, delicacy and power. Its original vertical thrust is attenuated by the radial extension of the arms, softly opening like petals. The main decorative feature, which gives the collection its name, is the spiral motif that wraps the arms and opens in the uppermost part, accentuating its shape. Completely crafted by hand, it reveals the great skill of the glass maker to create a very complex, detailed yet perfectly regular arrangement of curves. The light source, wrapped by this painstakingly decorated chalice, is also enclosed by another cup that flares upward. The result is a rigorous aesthetic of forceful, seductive character, pervaded by sophisticated grace.

This Italian luxury wall lamp is offered with 1 or 2 arms, and it includes bulbs for each arm, along with an additional bulb or LED at the bottom of the fixture. UL listed lighting.

Made in Italy.

Finishes & Materials

Murano Structure: Venetian Crystal.

Inner Structure & Details: Metal.
