

141

Description

The 141 series is crafted by pouring two ladlefuls of hot glass freehand over a curved rod to create two overlapping puddles. The rod is then lifted, and the puddles wing out into an unpredictable shape in a gesture that is both simple and cinematic at once. After this process, the rod is replaced with an LED light source.

The 141 Series uses a coaxial cable suspension system, and each pendant includes 118"1/8 of coaxial cable, which can be adjusted on site. Longer lengths are available for an additional charge. Lamps and power supplies are included.

Different configurations are available, with 3, 5 or 7 pendants.
