

## Swan

*Design: Duccio di Segna*

### *Description*

With a timeless form and luminous presence, this refined pair of swans is sculpted from the pure and radiant crystal of Colle Val d'Elsa, renowned for its centuries-old tradition of Italian glassmaking excellence. With delicately arched necks and gently curved silhouettes, the two swans embody serenity and poetic symmetry.

Their fluid contours and polished surfaces reflect light with a subtle sheen, projecting resplendent glimmers that change with every angle. Whether displayed opposite each other in symbolic union or side by side in elegant stillness, the pair evokes harmony, fidelity, and understated grandeur. Made in Italy.
