

Moorea

Design: Carlo Colombo

Description

Armchair designed with an extremely high standard of materials for outdoor use, to meet different contexts. The entire structure is made of AISI 316L Pewter painted stainless steel, chosen to guarantee a particular resistance to corrosion in different environments, thanks to the composition of the main alloy elements. In order to ensure reliability, the mechanical fasteners between the parts are also made of stainless steel.

The backrest and armrests are made of solid Teak wood in a natural finish, a wood that is highly esteemed for its technical and aesthetic qualities. The seat upholstery is made of open-cell draining rubber, allowing water and humidity to pass through and significantly reducing drying time. The seat design has been developed with specific drain holes to ensure the ventilation of the padding area and its relative dryness. The backrest cushion, fastened to the frame with a zip fastener, is also made of open-cell draining rubber. Upholstered with completely removable fabrics from the Open-air collection. Covering is recommended in case of rain. Made in Italy.
