Design: Giorgetti R&D

GIORGETTI
Maserati EDITION

Description

A sofa with fixed dimensions, inspired by the sinuous lines and soft shapes of the Maserati chassis. It is a true sculptural piece, combining aesthetics and functionality, with the intention of creating a sculpture to live on and interact with. Its complex, curved shape is not only aesthetic, but also has a practical function: the curves and joints are designed to optimize ergonomics and comfort.

The design develops into two distinct elements that combine to create the backrest and seat, creating a dynamic balance. The structure is made of a high-performance composite material that guarantees the construction of complex structural shapes that are at the same time light. The padding is in a multidensity polyurethane on a belted structure. The monochrome upholstery is available in Satin leather or in fabric.

The stitching is a fundamental element of the design, recalling the collection's concept of lines generated in the wind tunnel and, at the same time, guaranteeing a perfect fit of the upholstery. 3/8" thick bases are available in lacquered titanium. Made in Italy.
