

Twins

Design: Emilio Nanni

Description

Brilliant, versatile, and never ordinary, the Twins side tables are an expression of dynamism and creativity—sculptural pieces that transform any space with their solid, geometric presence.

Designed with adaptability in mind, compositions A and B can be positioned both upright and upside-down, offering multiple interpretations of form and function. Composition 3, featuring two modules of different heights, is intended exclusively for the upside-down arrangement, highlighting its unique interplay of volumes. Each module can be finished in a different material, allowing for unique combinations and personalized contrasts. The result is a collection that celebrates flexibility, balance, and a bold contemporary spirit.

Made in Italy.
