

Blom

Design: Andreas Engesvik

Description

Blom is a fun small table lamp that is easy to pick up and move, suitable for any purpose. The name derives from the shape of the lamp which, with petal-like blades, is reminiscent of a flower. The amount of light is adjustable thanks to the two petals that gently wrap around the diffuser and which, by rotating on the base, allow the luminous flux to be shielded, customising it according to requirements.

The frame is made of painted aluminum with polycarbonate petals and the diffuser is made of milk-white and opaline polyethylene. Transparent power cable, plug and switch. Made in Italy.

Light source:

1 x max 11W E12. Bulb not included.

Dimensions

Ø5"7/8 x 9"3/8H
