

S Table

Design: Xavier Lust

Description

Designed by Xavier Lust, S Table stands out for its sculptural base with a distinctive S-shaped twist, expressing the visual tension and dynamic curves that characterise the designer's language. A striking and sculptural presence, it enhances any outdoor setting with the sense of movement generated by its curved lines. The white and anthracite concrete finishes lend a tactile, material quality to the surfaces, creating a strong visual and sensory impact that blends harmoniously with the surrounding environment, while the transparent and extra-clear glass top adds lightness and depth to the design, highlighting the table's proportions and character. Made in Italy.

Finishes & Materials

Top: Glass or Cement (matching the base color)

Base: White or Anthracite Cement
