

Twister

Design: Wave Murano Glass

Description

Twister is an elegant set of two complementary Murano glass vases that channels the raw energy and graceful motion of natural tornadoes. The clarity of the glass, combined with the movement embedded in its shape, creates mesmerizing transparent refractions, intensified when illuminated by focused light. The result is a play of brilliance and shadow that adds an almost ethereal dimension to any space.

The Twister collection is a striking testament to the artistry of Murano glassmaking. Imposing yet refined, each vase stands as a sculptural centerpiece that elevates both contemporary and classic interiors with its dynamic presence and timeless sophistication. Made in Italy.
