

## Foil

*Design: Francesco Rota*

### *Description*

FOIL is an armchair that balances practicality and elegance, stability and lightness. Its slender, fluid profile connects the high backrest to the armrests and wide seat, creating an enveloping sense of comfort ideal for work environments and beyond.

The shell, made of fire-retardant polyurethane foam with rigid polyurethane inserts, is upholstered in a wide range of fabrics without the use of glues.

Available with a solid ash wood base in various finishes or a 4-leg powder-coated steel base with polypropylene feet, FOIL conveys warmth and contemporary style while ensuring that all components are easily recyclable, a refined expression of sustainable design.

Made in Italy.
