

Kami

Design: Mario Ferrarini

Description

KAMI, a multipurpose element with great character, designed by Mario Ferrarini, which can also be a versatile addition to our collections. Drawing inspiration from the ancient art of origami, KAMI – which not surprisingly means ‘paper’ in Japanese – was created by imagining folding the material (plywood) to obtain a three-dimensional object, where aesthetic appeal harmoniously blends with not only function but also ergonomics.

Freestanding, sturdy and graphic, KAMI is a truly versatile solution, which easily fits into any home and contract context, adding character. Made in Italy.

Dimensions

Size: 16"1/8W x 16"1/8D x 18"1/8H
