

Amanita

Design: Mariana Pellegrino Soto

Description

Amanita is a sophisticated reading lamp composed of two distinct discs: the slimmer disc serves as the base, while the thicker upper disc houses the LED bulb. These two elements are elegantly connected and spaced by a slim, oblique stem shaped like a graceful 'Z', giving the lamp a sculptural and distinctive silhouette.

The same design concept, with revised proportions and updated materials and finishes, is also available in an outdoor version. In this reinterpretation, Amanita transforms into an elegant outdoor path-light, seamlessly blending functionality with decorative appeal. Its refined finish, paired with its sleek and timeless presence, makes it a luxury lighting fixture destined to enhance the atmosphere of the most prestigious gardens and public spaces. Made in Italy.

Dimensions

Ø12"1/8 x 26"3/4H - Cod. 319

Light source: 1 x max 6W (LED) 3000°K - 600 lm CRI>85 - With bulb

Finishes & Materials

Structure: Painted metal with sloped conical stem.

Diffuser Disk: Transparent PMMA.
