

Berlin

Design: Christophe Pillet

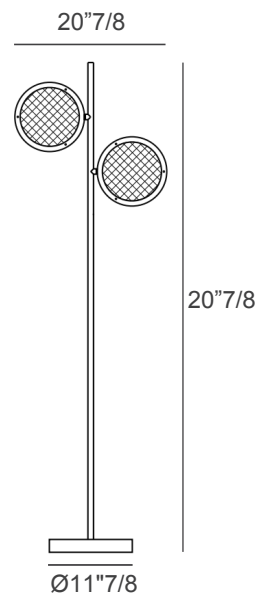

Description

The Berlin collection, winner of the Archiproducts Design Awards – 2017, reveals its refinement through thick metal ring diffusers framing two discs of wired glass, embraced by a slender, architectural profile. The lamp features two diffusers, each one rotates 360°, offering complete flexibility to adapt light to specific needs. Berlin draws inspiration from art deco elegance, enriched by the sophistication of its finishes. Powered by LED technology, the collection unites vintage charm with modern innovation. More than just a lamp, it is a piece of luxury designer lighting that encourages interaction: an object that transforms its users into active creators of their own light environment, adjusting and calibrating it to their personal rhythm and lifestyle. Made in Italy.

Dimensions

20"7/8W x 70"7/8 - Cod. 323

Light source: 2 x max 15W (LED) 2700°K - 4300 lm
CRI>85 - With bulb - With dimmer

Finishes & Materials

Structure: Metal.

Diffuser: Sand-blasted wired glass.
