

## Berlin

*Design: Christophe Pillet*

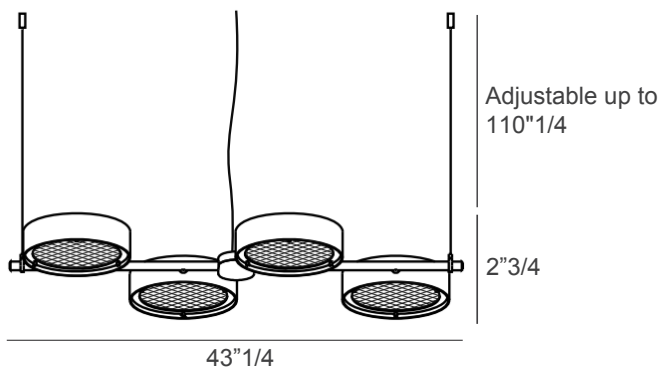

### *Description*

Berlin expresses its refinement through thick metal ring diffusers with a slender profile that frames two discs of wired glass. In the floor-standing version, the lamp features two diffusers, while the suspension model includes four, all supported by a slim tubular stem and designed to rotate 360° to meet specific lighting needs. In these new editions, Berlin reveals its sophisticated and prestigious character, combining materials and design in a way that transforms light into an interactive experience. This luxury lighting design invites users to become conscious creators of their own illuminated space, adjusting and calibrating the atmosphere to suit personal requirements. Made in Italy.

### *Dimensions*

43"1/4W x 2"3/4H + 110"1/4 of Cables (Adjustable height) - Cod. 823

**Light source:** 4 x max 15W (LED) 2700°K - 8600 lm CRI>85 - With bulb

### *Finishes & Materials*

**Diffuser:** Sand-blasted wired glass.  
**Structure:** Metal.
