

## Calamaio

*Design: Cervellieri, Di Lorenzo, Montini*

### *Description*

Calamaio is a designer wall lamp that brings light exactly where it is needed through a rotating head mounted on a mobile structure. Made entirely of metal, it is composed of two slender cylindrical stems connected by a pivot, allowing the head to be oriented with precision. At its tip, the integrated LED light source creates a focused and directed beam, perfect for task or accent illumination. The body of Calamaio is anchored to a spherical element resting on a circular base, enabling wide rotation and freedom of movement.

Its contemporary design is defined by the play of pure, essential forms and enriched by interaction with the user, reflecting a balance of functional beauty and artistic vision. Lightweight yet versatile, Calamaio reveals its distinctive personality through bold, glossy lacquer finishes. A piece of luxury lighting design, it transforms spaces with its sleek, modern elegance, offering a statement that is both sophisticated and playful. Made in Italy.

### *Dimensions*

11"7/8W x 7"7/8H - Cod. 798

**Light source:** 1 x max 2W (LED) 2700°K - 285 lm CRI>85 - With bulb

### *Finishes & Materials*

**Structure:** Metal.
