

Colombo

Design: Joe Colombo

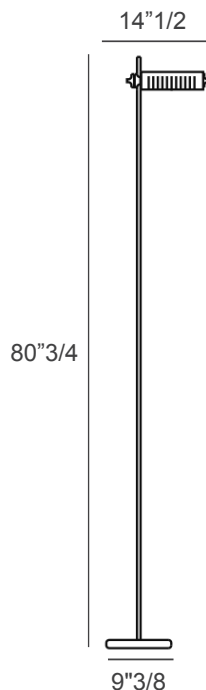

Description

The Colombo lamp, designed in 1970 by the visionary and futuristic designer Joe Colombo, stands as one of the first domestic lamps to embrace the then-revolutionary halogen light. Its design – composed of a solid base, chrome stem, and an adjustable reflector – shows Colombo's unique ability to merge clean, modern shapes with technological functionality, perfectly aligned with his innovative design philosophy. The Colombo family has remained for over four decades one of the most iconic and best-selling models in the Oluce catalogue, embodying the timeless appeal of luxury lighting design. To celebrate its 50th anniversary, the collection was updated with a modern LED dimmer version, a refined evolution that preserves the lamp's essential elegance while enhancing its performance for today's needs. Made in Italy.

Dimensions

14"1/2W x 9"3/8D x 80"3/4H - Cod. 626

Light source: 1 x max 24W (LED) 2700°K - 3300 lm CRI>85 - With bulb
- With dimmer

Finishes & Materials

Structure: Metal.
