

Coupé

Design: Joe Colombo

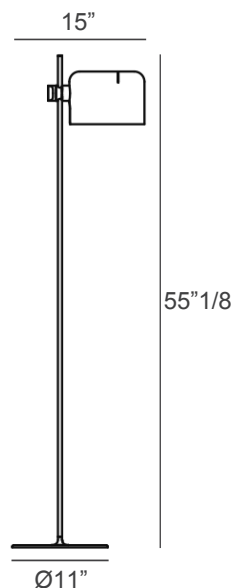

Description

The Coupé series, designed by the visionary Joe Colombo, was originally conceived as a sophisticated variation of the iconic Spider family, from which it retains its distinctive base and stem. Defined by a simple yet ingenious mechanism, the dome can be directed up, down, or sideways, allowing the beam of light to be oriented with remarkable ease and versatility. Winner of the prestigious International Design Award from the American Institute of Interior Designers in Chicago (1968), Coupé has since become a timeless icon of luxury lighting design. Today, it proudly belongs to the permanent collections of the MoMA in New York and the Neue Sammlung Museum in Munich, affirming its status as one of the most important examples of designer lighting in the world. Celebrated for its refined proportions, exclusive design, and enduring modernity, Coupé remains one of the most renowned and appreciated collections in the Oluce catalogue. Made in Italy.

Dimensions

15"W x 55"1/8H - Cod. 3321

Light source: 1 x max 100W (E26) - Without bulb

Finishes & Materials

Adjustable Reflector: Lacquered aluminum.
