

Coupé

Design: Joe Colombo

Description

The Coupé series, was originally conceived as a variation of the Spider family, maintaining its elegant base and stem while introducing a new mechanism. This exclusive feature, connecting the stem to the dome, allows the light beam to be directed up, down, or sideways with remarkable ease, combining functional innovation with modern elegance.

In 1968, Coupé was awarded the prestigious International Design Award by the American Institute of Interior Designers in Chicago. Today, it holds a place of honor in the permanent collections of both the MoMA in New York and the Neue Sammlung Museum in Munich, affirming its status as a true icon of Italian design.

Available with either a semi-cylindrical or a semi-spherical dome, the collection has evolved over the years into numerous high-end models, from table to floor and wall versions. Distinguished and timeless, Coupé remains one of Oluce's most renowned and appreciated collections, admired worldwide for its refined exclusivity, iconic silhouette, and timeless modernity.

The Mini version is sold in a set of two lamps, while the Standard version has no minimum order requirement.

Made in Italy.
