

Dancing Glass

Design: Victor Vasilev

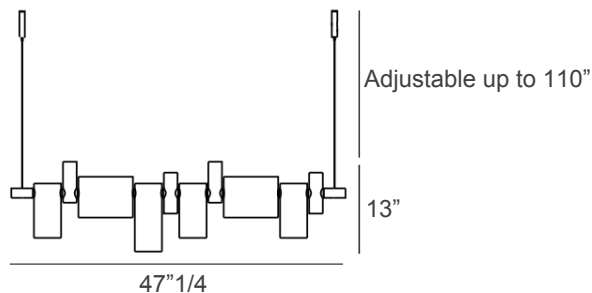

Description

Dancing Glass embodies the elegance of a sophisticated lighting technique, where light is transformed into poetry. Its horizontal structure expertly conceals the LED source, giving rise to unprecedented light layouts. The lamp's dynamic, irregular shapes play with shadows and reflections, creating the illusion of a moving sculpture. The use of glass gives a play of light and shadow, celebrating, as the name evokes, the dance of light. This glass suspension lamp features up-and-down LED lighting with individually adjustable reflectors, allowing for a customizable lighting experience. Made in Italy.

Dimensions

47"1/4W x 13"H + 110" of Cables (Adjustable height) - **DANCING GLASS 457**

Light source: 2 x 28W (LED) 2700°K - 6150 lm - CRI>90 - With bulb - Dimmable
