

## Dancing Glass

*Design: Victor Vasilev*

### *Description*

The Dancing Glass stays true to the playful spirit of the original collection, offering a more refined, minimalist expression where the cylindrical form becomes the focal point. The design seamlessly blends the beauty of glass with light, creating a stunning play of shadows and reflections that evokes the fluid movement of light itself. As the name suggests, it celebrates the graceful dance of light.

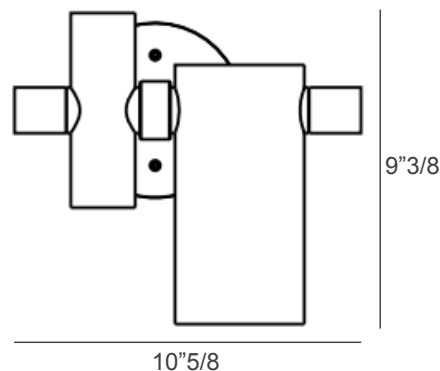

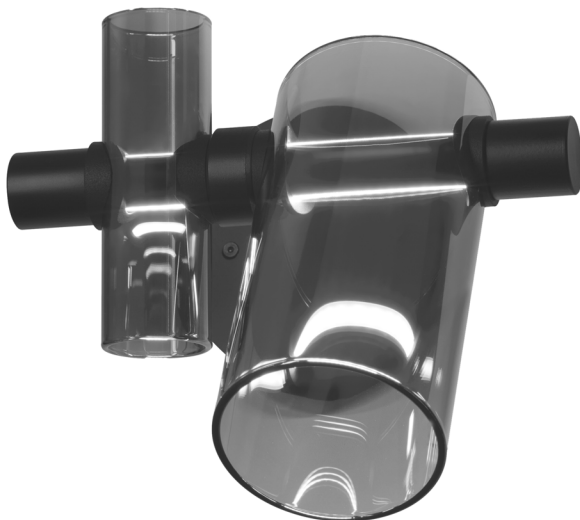

This luxury wall lamp transforms your space with its up-and-down LED lighting with adjustable reflectors, offering an elegant, dynamic glow while maintaining the same sense of movement and light play as its suspension counterpart.

Made in Italy.
