

## Fresnel

*Design: Joe Colombo*

### Description

Fresnel is conceived as one of those perfect objects that time itself has refined, where essentiality and practicality become synonyms of elegance. With its iconic Fresnel lens as the absolute protagonist, the lamp embodies timeless functional beauty and a balance between technical design and poetic simplicity.

Over the years, different versions have been created, suitable for both indoor and outdoor use, as well as a floor lamp designed exclusively for outdoor spaces. Its discreet metal body completes the structure with understated sophistication, prioritizing functionality above ornament. A true luxury designer lighting piece, Fresnel stands as an iconic and refined lighting fixture, capable of delivering prestigious and contemporary illumination in both private and public environments. This exclusive piece is only available as a set of four lamps. Made in Italy.
