

Ilo

Design: David Lopez Quincoces

Description

Winner of the Archiproducts Design Awards in 2019, Ilo is a sophisticated range of LED designer lighting created by Madrid-based designer David Lopez Quincoces. With its architectural references, clean lines, and exquisite finishes, Ilo embodies a perfect balance between precision and decorative spirit. Its sleek design and luxury lighting fixtures aesthetic allow it to integrate seamlessly into both contemporary and classic interiors, becoming a refined statement piece. The collection includes a suspension lamp and a wall light, both defined by the same slender aluminum bar that houses the light source, crafted with meticulous precision. In the suspension version, the bar is divided into two contrasting sections: one resembling a handle, the other concealing the long LED bulb. This generous proportion, paired with its slim profile, creates a modern and elegant presence. With its luxury designer lighting character, Ilo expresses functional beauty while bringing sophisticated, contemporary lighting design into any space. Made in Italy.

Dimensions

74"3/4W x 118"1/8H (Adjustable cables) - Cod. 487

Light source: 1 x max 25W (LED) 2700°K - 2750 lm CRI>85 - With bulb
