

## Ilo

*Design: David Lopez Quincoces*

### *Description*

Winner of the German Design Award – 2020 and the Archiproducts Design Awards – 2020, Ilo is a sophisticated range of LED designer lighting created by Madrid-based designer David Lopez Quincoces. With its architectural references, clean lines, and exquisite finishes, Ilo embodies a perfect balance between precision and decorative spirit. Its sleek design and luxury lighting fixtures aesthetic allow it to integrate seamlessly into both contemporary and classic interiors, becoming a refined statement piece.

The collection includes a suspension lamp and a wall light, both defined by the same slender aluminum bar that houses the light source, crafted with meticulous precision. The wall lamp is mounted on a square plate, with a pivot system that enables movement in any direction and a 90° rotation of the fixture itself, offering versatile aesthetic and functional solutions. With its luxury designer lighting character, Ilo expresses functional beauty while bringing sophisticated, contemporary lighting design into any space. Made in Italy.
