

Lens

Design: Francesco Rota

Description

Lens was inspired by contemporary sculpture, transforming curved surfaces into an elegant interplay of reflections and light. This designer wall lamp functions as a direct light source, with a concave screen that delicately shields the bulb while enhancing the surrounding atmosphere with a distinctive sculptural presence.

Available in refined finishes, Lens is much more than a lamp: it is a luxury lighting fixture with strong decorative value. Its design merges functional beauty with artistic sophistication, while the halogen light source illuminates interiors with accuracy, precision, and character.

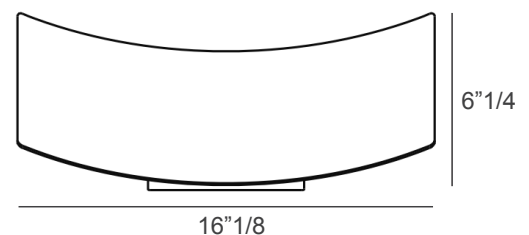

With its luxury designer lighting identity, Lens stands as a timeless and elegant statement piece, perfect for those seeking high-end, contemporary lighting design that doubles as both illumination and art.

Made in Italy.
