

Lyndon

Design: Vico Magistretti

Description

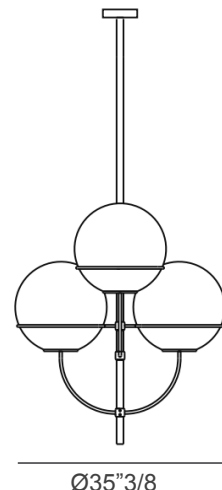

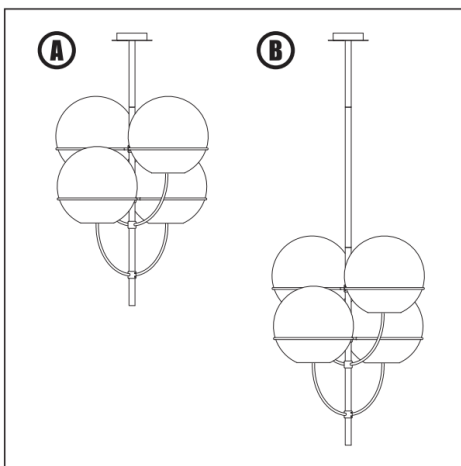

Lyndon, designed by Vico Magistretti in 1977, has evolved over the years into a versatile collection that includes a wide range of variations and sizes, from indoor to outdoor use, available as suspension, floor, or wall lamps. Its candelabra-style structure reflects Magistretti's mastery of timeless elegance. The frame gracefully adapts to its function, extending to embrace the transparent glass spheres that encase the light source, creating a dialogue between classic design and modern living. The architect and designer's passion for pure, geometric forms resurfaces in Lyndon, transforming atmospheres inspired by the grand capitals of the late 19th century into a contemporary designer lighting fixture. This collection embodies luxury lighting design, uniting historical charm with a timeless aesthetic, making it an iconic statement piece in both private and contract settings. Made in Italy.
